

RFMD Announces Availability of the RFMD(R) GPS RF8110 Scalable GPS Solution

November 16, 2006

RFMD Announces Availability of the RFMD(R) GPS RF8110 Scalable GPS Solution GREENSBORO, N.C.--(BUSINESS WIRE)--Nov. 16, 2006--RF Micro Devices, Inc. (NASDAQ: RFMD), a global leader in the design and manufacture of high-performance radio systems and solutions for applications that drive mobile communications, today announced the availability of samples of the RF8110 scalable GPS solution - a software/host based GPS solution. The RF8110 scalable GPS solution combines a RFIC and software to deliver advanced GPS technology to next generation mobile phones and personal multimedia and navigation devices. It is the first in RFMD's line of scalable GPS solutions, which allow optimization of such factors as cost, battery life, size and performance. The RF8110 offers accurate positioning data (even while indoors) and requires the fewest number of components, resulting in the lowest total bill-of-materials cost. In addition, it allows customers to utilize their internally developed GPS functions, such as navigation and mapping, in order to accommodate multiple navigation architectures.

"The RF8110's adaptable software-based architecture allows customers to easily add features, upgrade or customize their product," said Dave Lyon, RFMD Vice President of Wireless Connectivity. "We're pleased that large OEMs are recognizing that software-based scalable GPS is the wave of the future."

RFMD anticipates production shipments of the RFMD GPS RF8110 scalable GPS solution will commence in March of 2007.

Additional information about the features and pricing of the RF8110 can be found by visiting www.rfmd.com.

About RFMD: RF Micro Devices, Inc. (NASDAQ: RFMD) is a global leader in the design and manufacture of high-performance radio systems and solutions for applications that drive mobile communications. RFMD's power amplifiers, transmit modules, cellular transceivers and system-on-chip (SOC) solutions enable worldwide mobility, provide enhanced connectivity and support advanced functionality in current- and next-generation mobile handsets, cellular base stations, wireless local area networks (WLANs), wireless personal area networks (WPANs) and global positioning systems (GPS). Recognized for its diverse portfolio of state-of-the-art semiconductor technologies and vast RF systems expertise, RFMD is a preferred supplier enabling the world's leading mobile device manufacturers to deliver advanced wireless capabilities that satisfy current and future market demands.

Headquartered in Greensboro, N.C., RFMD is an ISO 9001- and ISO 14001-certified manufacturer with worldwide engineering, design, sales and service facilities. RFMD is traded on the NASDAQ Global Select Market under the symbol RFMD. For more information, please visit RFMD's web site at www.rfmd.com.

This press release includes "forward-looking statements" within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, but are not limited to, statements about our plans, objectives, representations and contentions and are not historical facts and typically are identified by use of terms such as "may," "will," "should," "could," "expect," "plan," "anticipate," "believe," "estimate," "predict," "potential," "continue" and similar words, although some forward-looking statements are expressed differently. You should be aware that the forward-looking statements included herein represent management's current judgment and expectations, but our actual results, events and performance could differ materially from those expressed or implied by forward-looking statements. We do not intend to update any of these forward-looking statements or publicly announce the results of any revisions to these forward-looking statements, other than as is required under the federal securities laws. RF Micro Devices' business is subject to numerous risks and uncertainties, including variability in quarterly operating results, the rate of growth and development of wireless markets, risks associated with the operation of our wafer fabrication facilities, molecular beam epitaxy facility, assembly facility and test and tape and reel facilities, our ability to attract and retain skilled personnel and develop leaders, variability in production yields, our ability to reduce costs and improve gross margins by implementing innovative technologies, our ability to bring new products to market, our ability to adjust production capacity in a timely fashion in response to changes in demand for our products, dependence on a limited number of customers, and dependence on third parties. These and other risks and uncertainties, which are described in more detail in RF Micro Devices' most recent Annual Report on Form 10-K filed with the Securities and Exchange Commission, could cause actual results and developments to be materially different from those expressed or implied by any of these forward-looking statements.
