We are Qorvo®

Qorvo At-A-Glance

- Nasdaq: QRVO
- 5,100 global employees
- FY26 revenue: $3.7 billion
- Innovative connectivity and power solutions
- Competitive advantages in manufacturing, product and technology leadership, engineering, customer relationships
- Providing solutions for diverse, high-growth segments of large global markets

Qorvo supplies innovative semiconductor solutions that make a better world possible. Qorvo's connectivity and power technology maximize efficiency in consumer electronics and a broad range of commercial and defense applications. The Company combines product and technology leadership, systems-level expertise and global manufacturing scale to solve its customers' most complex technical challenges.

Key Applications Automotive | CATV Networks | 4G & 5G Cellular Networks | Customer Premises Equipment (Wi-Fi Set-top Boxes & Gateways/Routers | Data Storage | Defense & Aerospace | Enterprise Networks (Wi-Fi Access Points) | Electric Vehicle | Industrial Power | Intelligent Motor Control | IoT Networking & End-Nodes (Bluetooth®, Zigbee & Matter™) | Mobile Devices | NB-IoT | Radar | Satellites

Key Products Amplifiers | Analog/Mixed-signal Power Solutions | Antenna Control Solutions | Beamformer ICs | Communication SoCs (Systems on a Chip) | Control Products | Discrete Components | Filters & Duplexers | Frequency Converters | Integrated Modules | Mobile Wi-Fi Solutions | Multiplexers | Oscillators | RF Fusion™ & RF Flex™ Solutions | RF MEMS | Switches | Ultra-wideband (UWB) Solutions

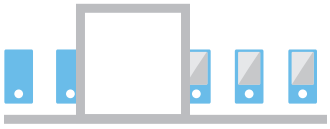

Centered on Customers

Qorvo helps customers by solving RF and power complexity. Only Qorvo offers all core technologies needed to deliver highly integrated solutions that help connect, protect and power the planet. The company brings 30+ years of end-to-end expertise, from the network to the device.

Centered on Innovation

Qorvo brings unique strengths to innovative solutions for diverse, high-growth segments of large global markets. These markets include automotive, consumer, defense & aerospace, industrial & enterprise, infrastructure and mobile.

Recognized by the Global Semiconductor Alliance (GSA) as the Most Respected Public Semiconductor Company* in 2022 and 2024
*Companies with $1 billion to $5 billion in annual revenue

Manufacturing Scale
Support large customers with high-volume manufacturing expertise

Product Leadership
Design and build high-value RF and power solutions to stringent customer demands

Systems Knowledge
Diverse engineering expertise spanning process, product and packaging technologies

Customer Relationships
Trusted supplier capable of solving customers' largest technical challenges
