RFMD(R) Expands Portfolio of RF Components to Include Narrowband MMIC VCOs With Integrated Dividers

14 New Narrowband VCOs Cover 7.2 - 15.1 GHz Frequency Range and Target Growing Point-to-Point Radio Market

BALTIMORE, June 6, 2011 (GLOBE NEWSWIRE) -- RF Micro Devices, Inc. (Nasdaq:RFMD), a global leader in the design and manufacture of high-performance radio frequency components and compound semiconductor technologies, today announced the expansion of its multi-market product portfolio to include the RFVC1831 — RFVC1844 family of MMIC voltage controlled oscillators (VCOs). The 14 new narrowband VCOs are optimized for the point-to-point (P2P) radio market, with cellular backhaul the leading application. The VCOs are also suited for satellite communications, test & measurement, aerospace & defense, and other defense and commercial applications.

The P2P radio market is growing rapidly, as the proliferation of smartphones and the increasing demand for mobile data are forcing cellular operators to expand capacity in cellular backhaul networks. RFMD's new narrowband MMIC VCOs satisfy operators' capacity expansion requirements by delivering industry-leading phase noise performance and minimal power consumption. The VCOs also feature monolithic construction and exhibit superior performance related to temperature, shock, and vibration.

Jeff Shealy, general manager of RFMD's Defense and Power business unit, said, "RFMD's RFVC1831 through RFVC1844 MMIC VCOs complement our existing RFUV and RFRX product families of integrated up-converters and down-converters and extend our commitment to providing the industry's most comprehensive and most technically advanced product portfolio for point-to-point microwave radio applications."

The excellent phase noise performance of RFMD's RFVC1831 - RFVC1844 MMIC VCOs enables the development of next-generation high capacity radios using complex modulation schemes. The VCOs also feature a common footprint, providing radio designers extra flexibility in designing outdoor base station units (ODUs) covering discrete radio bands from 6GHz to 38GHz. Finally, the VCOs feature integrated dividers that can be disabled if not required in particular applications.

RFMD is exhibiting the above components at the IEEE International Microwave Symposium 2011, June 6-8, at the Baltimore Convention Center, in Booth 1402.

Availability

Samples and production quantities are available now through RFMD's online store at http://www.rfmd.com/products or through local RFMD sales channels. Populated evaluation boards are also available.

About RFMD

RF Micro Devices, Inc. (Nasdaq:RFMD) is a global leader in the design and manufacture of high-performance radio frequency components and compound semiconductor technologies. RFMD's products enable worldwide mobility, provide enhanced connectivity and support advanced functionality in the cellular handset, wireless infrastructure, wireless local area network (WLAN), CATV/broadband and aerospace and defense markets. RFMD is recognized for its diverse portfolio of semiconductor technologies and RF systems expertise and is a preferred supplier to the world's leading mobile device, customer premises and communications equipment providers.

Headquartered in Greensboro, N.C., RFMD is an ISO 9001- and ISO 14001-certified manufacturer with worldwide engineering, design, sales and service facilities. RFMD is traded on the NASDAQ Global Select Market under the symbol RFMD. For more information, please visit RFMD's web site at www.rfmd.com.

This press release includes "forward-looking statements" within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, but are not limited to, statements about our plans, objectives, representations and contentions and are not historical facts and typically are identified by use of terms such

as "may," "will," "should," "could," "expect," "plan," "anticipate," "believe," "estimate," "predict," "potential," "continue" and similar words, although some forward-looking statements are expressed differently. You should be aware that the forward-looking statements included herein represent management's current judgment and expectations, but our actual results, events and performance could differ materially from those expressed or implied by forward-looking statements. We do not intend to update any of these forward-looking statements or publicly announce the results of any revisions to these forward-looking statements. other than as is required under the federal securities laws. RF Micro Devices' business is subject to numerous risks and uncertainties, including variability in operating results, risks associated with the impact of global macroeconomic and credit conditions on our business and the business of our suppliers and customers, our reliance on a few large customers for a substantial portion of our revenue, the rate of growth and development of wireless markets, our ability to bring new products to market, our reliance on inclusion in third party reference designs for a portion of our revenue, our ability to manage channel partner and customer relationships, risks associated with the operation of our wafer fabrication, molecular beam epitaxy, assembly and test and tape and reel facilities, our ability to complete acquisitions and integrate acquired companies, including the risk that we may not realize expected synergies from our business combinations, our ability to attract and retain skilled personnel and develop leaders, variability in production yields, raw material costs and availability, our ability to reduce costs and improve margins in response to declining average selling prices, our ability to adjust production capacity in a timely fashion in response to changes in demand for our products, dependence on gallium arsenide (GaAs) for the majority of our products, dependence on third parties, and substantial reliance on international sales and operations. These and other risks and uncertainties, which are described in more detail in RF Micro Devices' most recent Annual Report on Form 10-K and other reports and statements filed with the Securities and Exchange Commission, could cause actual results and developments to be materially different from those expressed or implied by any of these forward-looking statements.
