RFMD Expands Wireless Infrastructure Portfolio with New InGaP HBT Power Amplifiers

GREENSBORO, N.C.--(BUSINESS WIRE)--March 5, 2008--RF Micro Devices, (Nasdaq GS: RFMD), a global leader in the design and manufacture of high-performance radio frequency systems and solutions, today announced the expansion of its wireless infrastructure product portfolio with the introduction of the SPA-1426Z and SPA-1526Z power amplifiers. The SPA-1426Z and SPA-1526Z are one-watt and two-watt, respectively, Indium Gallium Phosphide (InGaP) power amplifiers that address base station applications across all cellular standards and frequencies.

The SPA-1426Z and SPA-1526Z Class A InGaP power amplifiers exhibit industry-leading backed-off linearity performance, which is particularly critical to WCDMA high power amplifier (HPA) applications. Housed in RFMD's proprietary SOF-26 package, the SPA-1426Z and SPA-1526Z lead their product class with lower thermal resistance (Rth) and lower power dissipation while providing RoHS and WEEE compliance. The SPA-1426Z and SPA-1526Z feature on-chip active bias circuitry and bias control pins, in addition to an input power detector and rugged class 1C ESD rating (greater than 1KV HBM).

The SPA-1426Z and SPA-1526Z are priced at \$5.78 and \$7.38, respectively, in quantities of 1,000 units with immediate sample availability.

About RFMD: RF Micro Devices (Nasdaq GS: RFMD) is a global leader in the design and manufacture of high-performance radio frequency systems and solutions. RFMD's cellular front ends, cellular transceivers, RF components and system- on-chip (SoC) solutions enable worldwide mobility, provide enhanced connectivity and support advanced functionality in the cellular handset, cellular base station, wireless local area network (WLAN), CATV networking, aerospace, defense, and global positioning systems (GPS) markets. Recognized for its diverse portfolio of state-of-the-art semiconductor technologies and vast RF systems expertise, RFMD is a preferred supplier to the world's leading mobile device and RF equipment manufacturers.

Headquartered in Greensboro, N.C., RFMD is an ISO 9001- and ISO 14001- certified manufacturer with worldwide engineering, design, sales and service facilities. RFMD is traded on the NASDAQ Global Select Market under the symbol RFMD. For more information, please visit RFMD's website at www.rfmd.com.

This press release includes "forward-looking statements" within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, but are not limited to, statements about our plans, objectives, representations and contentions and are not historical facts and typically are identified by use of terms such as "may," "will," "should," "could," "expect," "plan," "anticipate," "believe," "estimate," "predict," "potential," "continue" and similar words, although some forward-looking statements are expressed differently. You should be aware that the forward-looking statements included herein represent management's current judgment and expectations, but our actual results, events and performance could differ materially from those expressed or implied by forward-looking statements. We do not intend to update any of these forward-looking statements or publicly announce the results of any revisions to these forward-looking statements, other than as is required under the federal securities laws. RF Micro Devices' business is subject to numerous risks and uncertainties, including variability in quarterly operating results, the rate of growth and development of wireless markets, risks associated with the operation of our wafer fabrication facilities, molecular beam epitaxy facility, assembly facility and test and tape and reel facilities, our ability to complete acquisitions and integrate acquired companies, including the risk that we may not realize expected synergies from our business combinations, our ability to attract and retain skilled personnel and develop leaders, variability in production yields, our ability to reduce costs and improve gross margins by implementing innovative technologies, our ability to bring new products to market, our ability to adjust production capacity in a timely fashion in response to changes in demand for our products, dependence on a limited number of customers, and dependence on third parties. These and other risks and uncertainties, which are described in more detail in RF Micro Devices' most recent Annual Report on Form 10-K and other reports filed with the Securities and Exchange Commission, could cause actual results and developments to be materially different from those expressed or implied by any of these forward-looking statements.
