## **RFMD(R) Assembles 100 Millionth Module in Its Beijing Facility; Company On Track To Double Its Assembly Capacity In Beijing**

BEIJING, China--(BUSINESS WIRE)--June 7, 2006--RFMD® (Nasdaq: RFMD), a global leader in the design and manufacture of high-performance radio systems and solutions for applications that drive mobile communications, announced today that it has assembled its 100 millionth module in its Beijing, China, assembly facility. The Company attributes the assembly milestone to continued strong sales of its industry-leading portfolio of cellular power amplifiers.

Bob Bruggeworth, president and CEO of RFMD, made the announcement while touring the Company's Beijing facility. Bruggeworth stated, "Our power amplifiers are found in approximately one half of the world's phones, and our customers include all of the world's major handset manufacturers. We are particularly focused on supporting the growing presence of handset manufacturers in Asia, and we are committed to increasing our manufacturing capabilities in Asia as the region continues to evolve as the handset industry's manufacturing center."

RFMD is increasing its assembly capacity in its Beijing facility by approximately 100% in response to a robust handset market and continued strong demand for its module products. The Company is also expanding its Gallium Arsenide (GaAs) manufacturing capacity in its Greensboro, North Carolina, GaAs fabrication facility and expects to increase total GaAs wafer capacity by approximately 40%. The Company plans to complete both capacity expansions by the December 2006 quarter.

### **About RFMD**

RFMD is a global leader in the design and manufacture of high-performance radio systems and solutions for applications that drive mobile communications. RFMD's power amplifiers, transmit modules, cellular transceivers and system-on-chip (SOC) solutions enable worldwide mobility, provide enhanced connectivity and support advanced functionality in current- and next-generation mobile handsets, cellular base stations, wireless local area networks (WLANs), wireless personal area networks (WPANs) and global positioning systems (GPS). Recognized for its diverse portfolio of state-of-the-art semiconductor technologies and vast RF systems expertise, RFMD is a preferred supplier enabling the world's leading mobile device manufacturers to deliver advanced wireless capabilities that satisfy current and future market demands.

Headquartered in Greensboro, N.C., RFMD is an ISO 9001- and ISO 14001-certified manufacturer with worldwide engineering, design, sales and service facilities. RFMD is traded on the NASDAQ National Market under the symbol RFMD. For more information, please visit RFMD's web site at [www.rfmd.com](http://www.rfmd.com).

This press release includes "forward-looking statements" within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, but are not limited to, statements about our plans, objectives, representations and contentions and are not historical facts and typically are identified by use of terms such as "may," "will," "should," "could," "expect," "plan," "anticipate," "believe," "estimate," "predict," "potential," "continue" and similar words, although some forward-looking statements are expressed differently. You should be aware that the forward-looking statements included herein represent management's current judgment and expectations, but our actual results, events and performance could differ materially from those expressed or implied by forward-looking statements. We do not intend to update any of these forward-looking statements or publicly announce the results of any revisions to these forward-looking statements, other than as is required under the federal securities laws. RF Micro Devices' business is subject to numerous risks and uncertainties, including variability in quarterly operating results, the rate of growth and development of wireless markets, risks associated with the operation of our wafer fabrication facilities, molecular beam epitaxy facility, our assembly facility and our test, tape and reel facilities, our ability to attract and retain skilled personnel and develop leaders, variability in production yields, our ability to reduce costs and improve gross margins by implementing innovative technologies, our ability to bring new products to market, dependence on consignment sales through customer inventory hubs, our ability to adjust production capacity in a timely fashion in response to changes in demand for our products, dependence on a limited number of customers, dependence on third parties and the variability of future stock-based compensation charges or credits during the remainder of fiscal 2006 as a result of our stock option exchange program as well as the adoption of SFAS 123® in fiscal 2007. These and other risks and uncertainties, which are described in more detail in RF Micro Devices' most recent Annual Report on Form 10-K filed with the Securities and Exchange Commission, could cause actual results and developments to be materially different from those expressed or implied by any of these forward-looking statements.
