Pierre Carriere, Neutronics Components, Ltd

Kevin Townsend, Sands Technical Sales

Victor Koh, Avnet China

Todd DeBonis, Vice President of Sales at TriQuint, congratulated nominees and winners and thanked them for their support in helping continue to grow TriQuint's business. "The markets for our products – mobile phones & devices, GPS products, defense radar and aerospace satellites – are continuing to grow. Our solutions are not only in the devices, but also in the backhaul networks transporting the data, voice and video. This is an exciting time to be part of this business."

FACTS ABOUT TRIQUINT

Founded in 1985, we "Connect the Digital World to the Global Network"TM by supplying highperformance RF modules, components and foundry services to the world's leading communications companies. Specifically, TriQuint supplies products to four out of the top five mobile phone manufacturers, and is a leading gallium arsenide (GaAs) supplier to major defense and space contractors. TriQuint creates standard and custom products using advanced processes that include gallium arsenide, surface acoustic wave (SAW) and bulk acoustic wave (BAW) technologies to serve diverse markets including wireless handsets, laptops, GPS/PND, base stations, broadband communications and military. TriQuint is also the lead researcher in a multi-year DARPA program to develop advanced gallium nitride (GaN) amplifiers. TriQuint, as named by Strategy Analytics¹, is the number-three worldwide leader in GaAs devices and the world's largest commercial GaAs foundry. TriQuint has ISO9001 certified manufacturing facilities in Oregon, Texas, and Florida and a production plant in Costa Rica; design centers are located in North America and Germany. Visit TriQuint at www.triquint.com/rf to receive new product information and to register for our newsletters.
