RFMD(R) Expands Shanghai Facility to Include Research & Development

GREENSBORO, N.C.--(BUSINESS WIRE)--April 24, 2007--RF Micro Devices, Inc. (NASDAQ:RFMD), a global leader in the design and manufacture of high-performance radio systems and solutions for applications that drive mobile communications, today announced the addition of a research and development (R&D) center in the Company's Shanghai facility. Located in Shanghai's Zhanjiang High-Tech Park, the addition of this R&D center underscores the Company's continued growth in the world's largest market for handheld devices.

The new center will expand RFMD's product development capacity to support original design manufacturers (ODMs), original equipment manufacturers (OEMs) and local and international handset manufacturers throughout the Far East. Increasing RFMD's internal design capacity of front-end solutions and transceivers will allow for significantly improved design cycle times and reduced manufacturing and shipping costs to customers.

"The opening of RFMD's new research and development center greatly increases the value we provide our existing customers and enables RFMD to further meet customer demand in Greater China," said David Wang, RFMD country manager of China & director of the Shanghai research and development center. "With this new center, RFMD's world-class R&D team is better equipped to deliver innovative RF solutions that meet our customers' needs."

"RFMD's continued expansion into the Greater China market demonstrates our focus on supporting the local manufacturers in this territory," said Greg Thompson, RFMD vice president of worldwide sales and applications engineering. "This new location will expand our research and development efforts, while strengthening RFMD's operations across Greater China as a complete source for design, manufacturing, supply chain, sales and field applications engineering support."

With the addition of RFMD's new research and development center, the Company's investment in the Greater China market includes a sales and customer support center in Shenzhen, China, a module assembly facility and test and tape and reel facility in Beijing, China, a customer support center in Shanghai, China and a sales and customer support center in Taipei, Taiwan. RFMD employs more than 1000 people in the Greater China area

About RFMD: RFMD (NASDAQ: RFMD) is a global leader in the design and manufacture of high-performance radio systems and solutions for applications that drive mobile communications. RFMD's power amplifiers, transmit modules, cellular transceivers and system-on-chip (SOC) solutions enable worldwide mobility, provide enhanced connectivity and support advanced functionality in current- and next-generation mobile handsets, cellular base stations, wireless local area networks (WLANs) and global positioning systems (GPS). Recognized for its diverse portfolio of state-of-the-art semiconductor technologies and vast RF systems expertise, RFMD is a preferred supplier enabling the world's leading mobile device manufacturers to deliver advanced wireless capabilities that satisfy current and future market demands.

Headquartered in Greensboro, N.C., RFMD is an ISO 9001- and ISO 14001-certified manufacturer with worldwide engineering, design, sales and service facilities. RFMD is traded on the NASDAQ Global Select Market under the symbol RFMD. For more information, please visit RFMD's web site at www.rfmd.com.

This press release includes "forward-looking statements" within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, but are not limited to, statements about our plans, objectives, representations and contentions and are not historical facts and typically are identified by use of terms such as "may," "will," "should," "could," "expect," "plan," "anticipate," "believe," "estimate," "predict," "potential," "continue" and similar words, although some forward-looking statements are expressed differently. You should be aware that the forward-looking statements included herein represent management's current judgment and expectations, but our actual results, events and performance could differ materially from those expressed or implied by forward-looking statements. We do not intend to update any of these forward-looking statements or publicly announce the results of any revisions to these forward-looking statements, other than as is required under the federal securities laws. RF Micro Devices' business is subject to numerous risks and uncertainties, including variability in quarterly operating results, the rate of growth and development of wireless markets, risks associated with the operation of our wafer fabrication facilities, molecular beam epitaxy facility, assembly facility and test and tape and reel facilities, our ability to attract and retain skilled personnel and develop leaders, variability in production yields, our ability to reduce costs and improve gross margins by implementing innovative technologies, our ability to bring new products to market, our ability to adjust production capacity in a timely fashion in response to changes in demand for our products, dependence on a limited number of customers, and dependence on third parties. These and other risks and uncertainties, which are described in more detail in RF Micro Devices' most recent Annual Report on Form 10-K filed with the Securities and Exchange Commission, could cause actual results and developments to be materially different from those expressed or implied

by any of these forward-looking statements.
